

## Svenska Rekord

Ärade läsare!

Mångkampsstatistiken för de bästa Veteranerna genom tiderna t.o.m 2015 är nu klar. Statistiken har liksom tidigare år delats upp i tre delar:

1. Kastfemkamp
2. Femkamp
3. Tiokamp + Sjukamp

Denna del innehåller statistiken för FEMKAMP.

Undertecknad har tack vare idoge Sven Gärderud som under flera decennier arbetat med statistiken kunnat registrera 990(914 manliga och 76 kvinnliga) mångkamper.

Numera kommer undertecknad tillsammans med Mikael Magnusson att svara för mångkampssammanställningen i framtiden.

Enligt tidigare beslut från WMA, EVAA, som numera heter EMA och Svenska Veterankommittén har poängberäkningen i årets statistik beräknats med de av WMA (World Master Athletics) framtagna åldersfaktorerna gällande från år 2014 och som nu kallas Model 2014.

Till skillnad från den statistik, som publicerades t.o.m 2003 och som var indelad i olika åldersgrupper beroende på att olika redskap under årens lopp använts inom en och samma åldersgrupp, så har årets liksom senaste årens statistik enligt önskemål från flera aktiva veteraner slagits samman till en total statistik för varje åldersklass. Men för att få en rättvis poängberäkning kan ej samma åldersfaktor användas för olika redskap, som använts inom samma åldersklass. Därför har en kommitté inom WMA tagit fram åldersfaktorer som täcker samtliga grenar i samtliga mångkamper även med gamla redskap. Hela konceptet kallades fr.o.m. 2010 för Model 2010. Från och med 2014 har dock flera uppdateringar gjorts och hädanefter kallas åldersfaktorssamlingen för Model 2014. Samtliga aktuella åldersfaktorer i Femkamp redovisas nedan.

## Åldersfaktorer i Femkamp enligt WMA 2014

## Manliga veteraner

|     | Längd  | Spjut      | 200m   | Diskus    | 1500m  |

## Speciella kommentarer angående statistiken

I resultatlistan från Veteran-EM i Verona 1988 har endast poängen angivits, varför det varit omöjligt att inkludera dessa resultat i statistiken. Poängen beräknades nämligen efter helt andra åldersfaktorer år 1988.

Samma sak gäller resultaten från Veteran-VM i Puerto Rico 1983.

Om en tävlande inom samma åldersgrupp har genomfört flera femkamper där någon eller några genomförts med manuell tidtagning och någon eller några med elektrisk tidtagning så har resultaten från den bästa manuelle femkampen tagits med i statistiken om den varit bättre än resultatet från den bästa femkampen med elektrisk tidtagning. Annars har endast resultatet från femkampen med den elektriska tidtagningen redovisats.

I de mångkamper där någon brutit en gren eller avstått från att starta har resultatet markerats med X. Tidigare gällde att en deltagare blev oplacerad i en mångkamp om han eller hon ej startade i en gren. I föreliggande statistik har dock den nya regeln tillämpats, vilket innebär att samtliga mångkamper "godkänts".

Det kan påpekas att ingen avrundning till ett jämnt resultat har gjorts om ett udda resultat har uppmätts vid de långa kasten.

## Allmänt

Nordiska, Europeiska rekord samt Världsrekord i de olika mångkamperna har Ivar Söderlind samt undertecknad försökt få fram. Det har dock varit svårt att erhålla dessa uppgifter, varför vi får vänta ytterligare ett år för att få med dessa data i nästa upplaga av statistiken.

Slutligen har på sidorna 7-11 en sammanställning gjorts på alla mästerskapstävlingar som arrangerats t.o.m 2015 vad beträffar plats och tidpunkt eller tidsperiod.

Trots att det lagts ned mycket arbete på att hitta så många mångkamper som möjligt, kan det dock finnas resultat som ej kommit med, men som Du nu som läsare kanske känner till och som borde vara med. Dessutom saknas några födelsedata, som bör kompletteras. Om Du har några av dessa uppgifter, var då god och meddela detta till följande kontaktpersoner:
